

**Materials**

Frame is built out of 1 1/2" square aluminum profiles with powder coated paint. Oversized base with a non-marring full perimeter bumper system. Work surface is stainless steel with stainless steel fasteners and stainless steel corner guards.

**Casters**

Rides on 5" non-marking rubber casters. There are two swivel casters with locks and two rigid casters to allow for ease of mobility.

**Laminate**

High impact compact laminate 3/8" thick with premium scratch resistant finish.

**Thinscape® Performance Serving Top**

Bar top is 1/2" thick with durable composite that is scratch, stain, and heat resistant.

**Accessories**

Double walled insulated stainless steel ice well includes removable lid, is center set in the bar work surface and holds up to 20lbs of ice. Two removable stainless steel speed rails.

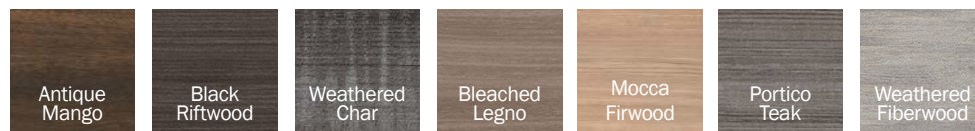

**Load Capacity:** 500 lbs
