

Table Surface

Table top is constructed of compact laminate which features higher impact, moisture, scratch and abrasion resistance. Table top surface is .5" thick. THINSCAPE® Performance Tops are available which are 1/2" thick, and crafted from hundreds of super-fine layers to provide maximum density and strength.

Frame

Table frame and legs are made from 2" steel. Legs are coated with durable powder coat paint.

Casters

Casters are 3" x 1-1/4" with solid soft rubber tread on a hard rubber core wheel with 3/8" I.D. ball bearing, 1/2" - 13 x 1" threaded stem, double ball raceway swivel fork with brake. 200 lbs. capacity per caster.

Load Capacity

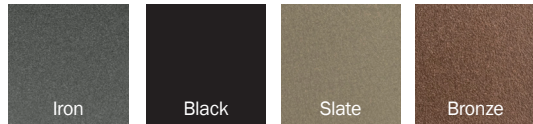

Tables will support up to 500 lbs. of distributed weight. Side tables will support up to 200 lbs. of distributed weight.
