

Table Substrate

All top panels and end caps are high strength alloy 6063-T6 extruded aluminum with a smooth finish. Table tops are constructed of individual aluminum boards with laminate adhered to surface. Top surfaces are .080" thick with integral stiffener ribs.

Table Surface

Inlay surface is high pressure laminate with premium scratch resistant finish, permanently bonded with contact adhesive.

Edgeband

1 1/2" x 2mm pvc vinyl edgeband material extruded and secured with a custom tongue and groove design.

Sustainability

Aluminum extrusions contain 70% **recycled** aluminum; 10% is post-consumer content, and 60% pre-consumer content. Southern Aluminum products are 100% recyclable. Laminate is **GREENGUARD** certified for low emissions. Laminate adhesive does not contain urea-formaldehyde resins.

Load Capacity

All table tops will support up to 3,000 lbs. of distributed weight.

iDesign™ Legs

All 6063-T6 extruded aluminum legs are welded together for strength, then attached to the table with zinc-plated bolts and nuts. Powder-coat paint is applied for finishing on all leg styles. Tube openings are covered by caps. A-leg glides are machined from UHMW. Painted legs are thermal set powder-coated finishes and have the hardest surface and maximum scratch/mark resistant qualities in the industry. Fasteners are aluminum and/or zinc plated steel.
