

Table Substrate

All top panels and end caps are high strength alloy 6063-T6 extruded aluminum with a smooth finish. Table tops are constructed of individual aluminum boards with laminate adhered to surface. Top surfaces are .080" thick with integral stiffener ribs. Painted legs are thermal set powder-coated finishes and have the hardest surface and maximum scratch/mark resistant qualities in the industry. Fasteners are aluminum and/or zinc plated steel.

Table Surface & Edge

Inlay surface and edge is high pressure laminate with premium scratch resistant finish, permanently bonded with contact adhesive.

Sustainability

Aluminum extrusions contain 70% recycled aluminum; 10% is post-consumer content, and 60% pre-consumer content. Southern Aluminum products are 100% recyclable. Laminate is GREENGUARD certified for low emissions. Laminate adhesive does not contain urea-formaldehyde resins.

Load Capacity

All table tops will support up to 3,000 lbs. of distributed weight.

Legs

Table legs are made from 1/8" x 2" x 4" rectangle, high strength 6063-T6 extruded aluminum. Leg style heights are available in 30" and 36". Corner bumpers are added to prevent collision damage. 2 1/2" Performa casters provide easy mobility.
