

Verge Table and Benches

Bench and Table tops consist of 1½” x 6” rectangular aluminum extrusions that are attached to an all-aluminum sub-frame for added strength. Table support structure is constructed of 2” x 4” rectangular extrusions. Table and Bench tops are available in a Powder Coated Finish or a Powder Coating with a Sublimated finish. The all-aluminum support structure is powder coated. Foot Glides are injection molded and made of durable glass-filled nylon.

Sustainability

Aluminum extrusions contain 70% recycled aluminum; 10% is post-consumer content, and 60% pre-consumer content. Southern Aluminum products are 100% recyclable.

Load Capacity

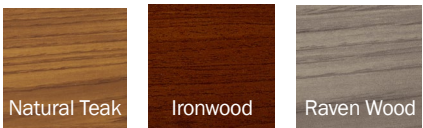

Table & Bench tops will support up to 1,000 lbs. of distributed weight each.

Design Options

Powder Coat Finishes\*

Sublimated Finishes\*

\* Printed colors may vary from the actual product.

Available Sizes

\* All tables have a height of 29.75”
